

Up-to-date global estimates of the value and volumes of agrochemicals used in treating crops and for non-crop applications,

2009 data

Crop Protection Actives

2010

(1998 - 2009 SALES DATA)

Online and laptop versions available

Compact Profiles on ALL Commercial Agrochemicals

By combining Agranova's comprehensive information on agrochemical actives with Croponosis Ltd's unrivalled experience of the agrochemical industry, Agranova has assembled a powerful database of essential information on agrochemical compounds. The 2010 edition presents compact technical and commercial profiles on the world's currently available crop protection actives (around 630 profiles).

Agranova has reformatted its commercial information and brought it up to date, so that it can now offer this easy to use electronic database. Four information-packed screens for each active ingredient presents:

- ⇒ **Technical review:** common and brand names, developer, structure, applications, usage, key patents, etc
- ⇒ **Sales and consumption** from 1998-2009, presented graphically for easy reference (figures are also shown)
- ⇒ **Commercial summary:** Ex-factory price estimates, historical crop sector usage breakdown (12 key crops), estimated minor and non-crop usage and the regulatory status in the EU, Japan and USA.
- ⇒ **2009 Active Ingredient Rankings (by sales and volume).** This presents a dynamic index of over 630 AIs in the database and allows rapid access to individual profiles

Crop Protection Actives - a must for all those concerned with developing, marketing or producing agrochemicals
