

Up-to-date global estimates of the value and volumes of agrochemicals used in agriculture, with AI prices, technical, regulatory and crop-use information

2018 data

Crop Protection Actives

2021 (2019 Update)

FOR EXISTING CLIENTS ONLY (2008 - 2018 SALES DATA)

Compact Profiles on ALL Commercial Agrochemical Actives

The 2019 edition presents compact technical and commercial profiles on the world's commercial crop protection actives (around 650 profiles). Four information-packed screens for each active ingredient presents:

- ⇒ **Global sales and consumption history** (at end-use level in USD million) and consumption (metric tons of active ingredient) from 2008-2018, presented graphically for easy reference (figures also shown).
- ⇒ **Technical review**, including information on common and brand names, developer, structure, applications, usage, key patents and first year of commercialisation.
- ⇒ **Commercial summary**: ex-factory AI prices, historical crop sector usage breakdown (12 key crops), estimated minor and non-crop usage and the regulatory status in the EU, Japan, China and USA.
- ⇒ **2018 Active Ingredient rankings (by sales and volume)**. This presents a dynamic index of over 650 AIs in the database and allows rapid access to individual profiles, as well as presenting many ways to create subsets (such as a list of all AIs first commercialised in any given year, total volumes of selected herbicides produced, searches by chemical name, etc).

Crop Protection Actives - a must for all those concerned with developing, marketing or producing agrochemicals
